Dear Mr. Shine:

Review of an application for access to the North Carolina Leaking Petroleum Underground Storage Tank Cleanup Funds for the above-referenced location is nearing completion. However, in the course of this review, it has been determined that additional information will be necessary in order to complete this process.

Information provided to us by the Winston-Salem Regional Office indicates that one 550-gallon underground storage tank (UST) was permanently closed by removal on April 27, 1993. It is also my understanding that the source of the petroleum hydrocarbons of gasoline and diesel fuels has not been determined.

Given the above information, please provide the following:

1. A site map that identifies the location and size for each UST (past or current) on the subject property;
2. A copy of the closure assessment report and laboratory analytical results that documents the presence or absence of contamination for all USTs permanently closed by removal at the subject property;
3. A copy of the most recent tank tightness testing results and the last three month's inventory records for all USTs currently in use.

Mr. Daniel P. Shine
February 2, 1995

Processing of the application will resume upon receipt of the requested information. In the interim, should there be any questions, please do not hesitate to contact me at (919) 733-1332 or at 441 N. Harrington Street, Raleigh, N.C. 27603-1323.

Sincerely,

George C. Matthis, Jr., Supervisor
